

A close-up photograph of a complex mechanical system with several interlocking gears of different sizes and colors (gold, silver, blue). The gears are set within a metallic frame, and the lighting creates strong highlights and shadows, emphasizing the industrial nature of the scene.

Escrow Services

With a global increase in M&A and divestment activity, complex situations requiring an escrow agent need true independence combined with a swift and commercial approach. These principles are at the heart of GLAS. We are ideally positioned to help you execute your transaction without delay.

Specialist support

GLAS offer in-house product specialists with extensive expertise in complex escrow transactions and debt restructurings. We provide tailor made flexible solutions across all manner of business sectors and geographical regions.

Thoroughly independent

GLAS operates with neutrality. We offer a commercial approach, fast and efficient turn around times and situation specific operational solutions.

Standard agreement, reduced costs

We provide a standard escrow agreement drafted by our in-house legal counsel and subject matter specialists. This is in line with the current market standards and regulatory and legal requirements.

We share our agreements promptly, offering practical and flexible solutions to capture your specific needs and transaction mechanics.

Single point of contact

A dedicated single point of contact from the team of escrow specialists work closely with you and your respective legal counsel, from the inception and concept stages, through to the negotiation and to the completion of the escrow.

GLAS are an independent, privately owned, conflict free, boutique service provider.

We are pioneers in the non-bank loan agency and corporate trustee market place, with a focus on providing administrative solutions to complex transactions.

We have a proven track record, having worked on transactions in distress, pre or post-restructuring or unusual in nature as well as vanilla transactions.

We work with speed and are flexible on timing to meet transaction deadlines.
